

SN Machinery & Tools

Multi Positioning Head:
Its help to do tapping on any degree surface and Accurate tapping without moving Machine OR Part.

HMI:
It is fitted front side of Arm, helps operate easily set desired speed, Tapping Depth and Tooth Pitch. Advance File saving option also available.

GREEN POWER

Servo Motor :
Highly Efficient Servo Motor which can Withstand Voltage fluctuations and tough work environment.

Gear Box:
Adopt Planetary reducer to provide powerful torque.

Tap Adaptors with Safety Clutch:
Unique designed tap adaptors are easy to fit and use. They are designed to work in both left and right hand tapping. Inbuilt adjustable safety clutch saves tap breaking

NC Controller Unit:
It is inbuilt in the arm design help to moving easily near to the part & save time.

Lubrication system
Automatic (Optional)

ARTICULATED ARM TYPE TAPPING MACHINE, FLEXIBLE, PORTABLE & PRODUCTIVE

Passion for Quality Products

SN Machinery & Tools

SNMT-16/SNMT-16 (BL)

Model	Tapping Capacity	Working Radius (MM)	Speed (RPM)	Torque (NM)	Power (KW)	Gross Weight (KG)	Automatic Lubrication Blow Air
SNMT-16	M3-M16	1000	300	40	0.6	30	No
SNMT-16(BL)	M3-M12	1000	300	40	0.6	30	Yes

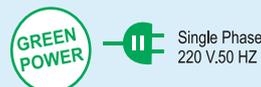

SNMT-24/SNMT-24 (BL)

Model	Tapping Capacity	Working Radius (MM)	Speed (RPM)	Torque (NM)	Power (KW)	Gross Weight (KG)	Automatic Lubrication Blow Air
SNMT-24	M6-M24	1200	200	134.9	2	30	No
SNMT-24(BL)	M6-M24	1200	200	134.9	2	30	Yes

SNMT-36/SNMT36 (BL)

Model	Tapping Capacity	Working Radius (MM)	Speed (RPM)	Torque (NM)	Power (KW)	Gross Weight (KG)	Automatic Lubrication Blow Air
SNMT-36	M6-M30	1200	150	359	2	50	No
SNMT-36(BL)	M6-M30	1200	150	359	2	50	Yes

SNMT-36/SNMT-36 BL

Advantages of Electric Tapping Machines

- Saving of Electricity over 85% compared to Pneumatic Machines.
- Easy setting of Tapping Speed and torque based on the work material and tap size.
- Plug and Play with Portability due to absence of Air Requirement. Just needs an electrical connection
- Change of Tapping Speed and Torque on finger tips with NC Unit.
- Easy to operate and maintain. Longer machine life compared to pneumatic machines.
- Designed to be Tough, Reliable and Safe to use.

Features of Electric Tapping Machine

- Automatic Control
- Manual Control
- Depth Control
- Pitch Control
- Torque Control
- Inbuilt Control Panel
- Multi Spindle head
- Interlocks for easy & safe Tapping
- Easy Maintenance
- Automatic lubrication system (Optional)
